

LABEL LIST
OF
INSECTS
OF THE
DOMINION OF CANADA.

COMPILED BY THE
NATURAL HISTORY SOCIETY OF TORONTO.

PRICE, ONE DOLLAR.

JULY, 1883.

TORONTO:
PRINTED BY C. BLACKETT ROBINSON, 5 JORDAN STREET,
1883,

QL476.N2

SECRET

PREFACE.

Owing to the great difficulty which Entomologists have experienced in obtaining a full list of names of the species identified in Canada for labelling their cabinet specimens during the last few years, the Natural History Society of Toronto decided to undertake the compilation of this Label List, together with a Check List, for convenience in exchanging specimens.

The Family and Generic names are printed in bold type for convenient and rapid overlooking.

There is a total of 5852 identified species—all of which are reported by some good authority as being Canadian. "Gender signs" have been introduced in the order Hymenoptera, which will be found a great advantage. In the Apidæ, Vespidæ and Formicidæ, the sign used to represent the *neuters* is 8, as adopted by Provancher and other authorities. It is to be hoped that those Orders and Families, which are poorly represented on the list, and which do not indicate much research in Canada, will be taken up by some specialists.

It is particularly desired that the name of any species not mentioned here will be sent to the compilers, as it is intended to publish additions and corrections as occasion demands.

Since going to press quite a number of new species in the different Orders have been received from correspondents in the Northwest Territory and British Columbia, which must appear in the first supplement.

W. BRODIE, L.D.S.

J. E. WHITE, M.B.

TORONTO NAT. HIST. SOCIETY, July, 1883.

N.B.—Copies of this, or Check List, may be obtained upon application to the Secretary, Natural History Society, Canadian Institute, Toronto.
